

The pallets may seem to be expensive to ship, but please bare in mind, they are double size and very heavy.

The pallets are delivered using Palletways delivery service. Palletways are asked to deliver the pallets on a vehicle with a tail lifter platform and unloaded with a pallet truck. This service is normally accepted as kerbside delivery.

However, drivers do try to be helpful and may assist in most cases to accommodate customers and try to place the pallet nearer to your preferred location.
